

I urge the FCC to vote against the proposed regulation change to allow common ownership. This is anti-free market, allowing only a few to controll what the many hear, and thus think. If this is to continue to be a free country, let us support diversity in thought! My life experience is that a boss's ideas are to be taken as first priority, and if many media outlets have a single boss, then where is the free flow of ideas, where is innovation, where is democracy??!
